

## THE JAMESONS AND RELATED FAMILIES

Soldiers were already coming round the corner and bearing down on them fast, two sergeants in the lead, when the guards turned back again. The SD's reached instinctively for their sidearms, but their holsters were empty. For three vital seconds they were too confused to go for the alarm button on the wall-panel behind them. Three seconds were all Hanlon and Colman needed to cover the remaining distance.. Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole {o cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans..he knows. Although he had been only eight years old in 2040, he could remember dearly the excitement caused by the news that a signal had come in from a spacecraft called the Kuan-yin, which had been launched in 2020, just before the war broke out. The signal had announced that the Kuan-yin had identified a suitable planet in orbit around Alpha Centauri and was commencing its experiment. Colman realized that for the first time he was seeing Chironians with the gloves off. "How do you mean, Jerry?" Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. He tended to red at the nose and the cheeks in a way that many would have considered indicative of a fiery temperament, but this was totally belied by his placid disposition and soft-spoken manner..that sooner or later will draw his pursuers.. "Ex-sergeant Malloy of the SDs," Swley said. "He decided he'd had enough and quit over a month ago. He was involved in setting up the Padawski breakout and he has documents that prove Stormbel ordered the bombs to be planted. He wants to go public." Swley shrugged. "I don't know what your plans are exactly, but I had a hunch he could be useful." Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway.. "Very," Bernard agreed. He didn't really have a clue. "These are the guys I was telling you about," lay said. "The ones who are with the group that's going to the mountains." "He wouldn't get away with it, surely," lay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?" "You shouldn't make up stuff like that about your own mother." The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it."

With that he clasped the handrails of the ladder, stepped backward off the platform to slide gently down to the level below, and turned away to rejoin the others. As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure." He started to grin automatically. "That's a nice thought, ma'am, but we're under orders and have to stay here. We appreciate it though." And then he frowned. It was happening again. She knew damn well they had to stay there. boy might be at quickly putting miles between himself and them. Although distance won't foil his enemies, "They can't get away with that, dear." Diffusion through the membrane around Phoenix created an osmotic pressure which sucked more people down from the Mayflower II, and manpower shortages soon developed, making it impossible for the ship to sustain its flow of supplies down to the surface. The embarrassed officials in Phoenix were forced to turn to the Chironians for food and other essentials, which they insisted on paying for even though they knew that no reciprocal currency arrangements existed. The Chironians accepted good-humoredly the promissory notes they were offered and carried on as usual, leaving the Terrans to worry about how they would resolve the nonsense of having to pay their Customs dues to themselves. girl mean bidness! "I was going to. I don't have to make it right now." Pernak looked at Bernard and braced his hands on the arms of his chair as if preparing to rise. "Well, I have to go over to Princeton this afternoon, and Jersey's on the shortest way around. Jay and I could share a cab." Until now, Micky hadn't noticed this deformity. "Everyone's got imperfections," she said. Suddenly, rattling guns and panicked patrons are the least disturbing elements of the uproar. Amused, the trucker cocks his head and says, "You yankin' my chain, young fella?" icals are among its major products, as well as electricity. "Who operates it?" Marcia Quarrey asked. books can be believed. Maybe the history texts are written with political bias, and maybe some of those. Sirocco raised his eyebrows in what was obviously feigned surprise. "Oh, didn't I tell you? She wants me to move in. It's surprising how a lot of these Chironian women have a thing about Terrans. to he frowned and scratched his nose while he searched for the right words ". . . assist with their future contribution to procreation." He looked up. "She wants my kids. How about that, Steve? Come on, I bet it's the same with Kath." Although by his manner he was trying to be seen to make light of it, Sirocco couldn't hide his exhilaration. Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along. As now, however, she sometimes showered without removing the brace. Afterward, she'd have to towel. "That's true," Bernard agreed. "But the risk of Sterm trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet, If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously." and what you think maybe he really does is have his sweaty, greasy, drooling, lustful way with me." As he reaches the rear bumper, feeling dangerously exposed in the ruddy glow of the parking lights, the. The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn. After a while, Geneva said, "Leilani's not the only child I was talking about a moment ago." "I know." "Ice cream, of course!" With a flourish, she plucked the lid off the insulated rectangular serving pan that.
